Education

CUNY – Hunter College

New York, NY

Bachelor of Arts in Computer Science, Minor in Mathematics

May 2027

Coursework: Data Structures & Algorithms, Object-Oriented Programming I & II, Software Analysis & Design III.

Experience

Software Quality Engineer Intern

September 2025 – Present

NBCUniversal

Stamford, CT

- Identified playback defects by analyzing HTTP logs via **Charles Proxy**, preventing failures across **2** NBC releases.
- Improved backend data accuracy by **15%** by auditing **CMS** inputs across sports and live stream Olympic content.
- Detected pre-release defects across Android and Roku by executing regression testing, ensuring application stability.
- Strengthened release quality by executing **50+** Jira test cases across **3** NBCO releases, blocking defects before release.

Software Engineer

October 2025 – Present

FlowState

New York, NY

- Architected an MVC-based **REST API** leveraging **OpenAI** to generate personalized resume-based interview questions.
- Enabled session persistence by designing a **MongoDB** pipeline to store interview data, allowing users to track progress.
- Secured user authentication by implementing **JWT**-based sign-in and session management for cross-origin access.

Software Engineer Intern

February 2025 – June 2025

The Difference App LLC

New York, NY

- Developed a full-stack health tracking application using **Node.js** and **MySQL**, enabling users to log daily habits.
- Reduced backend code by **40%** by refactoring routes into reusable functions, eliminating **80+** lines of duplication.
- Improved administrative data access by implementing structured **CRUD** endpoints for client-driven data operations.

Projects

Broker | *React, Node.js, Express.js, JavaScript, MarketStack API, OpenAI API, Postman*

GitHub

- Enabled stock performance analysis for **80+** users by developing a full-stack stock application analyzing market trends.
- Integrated MarketStack API, computing volatility and price momentum to power AI-driven stock analysis.
- Integrated OpenAI to analyze computed stock metrics, delivering real-time investment insights per user query.

PropertyAnalyzer | *Typescript, Node.js, Express.js, Docker, GCP (Cloud Run), OpenAI API, RentCast API* **GitHub**

- Built a property lookup REST API using TypeScript and Express, enabling instant address-based data retrieval.
- Integrated RentCast API to extract structured property data, delivering **10+** key property insights per query
- Containerized backend application with Docker and deployed to GCP Cloud Run, ensuring scalable serverless hosting.

PollenMapz | *React, Vanta.js, Node.js, Express.js, JavaScript, Google Maps/Pollen API, MapboxGL*

GitHub

- Built a pollen tracking app for **40+** users combining Google Pollen API and MapboxGL, locating low-pollen parks.
- Rendered real-time pollen severity levels and low-pollen parks by processing user location through Google Pollen API.
- Integrated Vanta.js animations to enhance UI visual appeal, improving overall user experience and engagement.

HabitAware – HunterHacks’25 Winner | *Python, MediaPipe, Streamlit, OpenCV, Git*

GitHub

- Collaborated with a team of three to build a computer vision tool that detects and tracks stress-related habits.
- Built a session timer tracking habit frequency and duration, surfacing behavioral insights in Streamlit.
- Implemented real-time audio alerts via OpenCV habit detection, reducing recurrence through immediate user feedback.

Technical Skills

Languages: TypeScript, JavaScript, C++, Python, SQL, HTML, CSS

Frameworks & Libraries: Vanta.js, React.js, Node.js, Express.js, Jest, Playwright, Drupal CMS, Tailwind CSS

Developer Tools: Git, GitHub, Docker, NPM, Postman, HTTPie, Jira, Railway, Vercel

Backend & API Technologies: REST APIs, GraphQL, OpenAI API, Express Routing, JWT, CRUD Operations

Databases/Cloud: MongoDB, MySQL, Google Cloud Platform (GCP)
