Education

CUNY – Hunter College

New York, NY

Bachelor of Arts in Computer Science, Minor in Mathematics

May 2027

Coursework: Data Structures & Algorithms, Object-Oriented Programming I & II, Software Analysis & Design III.

Experience

Software Quality Engineer Intern

September 2025 – Present

NBCUniversal

Stamford, CT

- Prevented playback failures by detecting streaming defects through regression testing using **Charles Proxy**.
- Improved backend data accuracy by **25%** auditing **CMS** inputs for sports and live stream content, resolving defects.
- Ensured NBC app stability across Android devices by executing regression and smoke tests on **Firebase** builds.
- Optimized release reliability by **10%**, detecting errors across **3** NBCO releases while executing **50+** Jira test cases.

Software Engineer

January 2025 – Present

FlowState

New York, NY

- Architected an MVC-based **REST API** integrating **OpenAI** to generate tailored interview questions from resumes.
- Generated AI interview feedback by integrating OpenAI APIs with **MongoDB**, improving system reliability by **15%**.
- Improved authentication security by implementing **JWT**-based authentication for cross-origin user sign-in and sessions.

Software Engineer Intern

February 2025 – June 2025

The Difference App LLC

New York, NY

- Enabled users to track weight loss and related habits by building a **Node.js** and **MySQL** full-stack application.
- Reduced Express.js route handlers from 200 to 120 lines by extracting reusable functions, eliminating duplicate logic.
- Streamlined administrative data access by implementing structured **CRUD** endpoints for client-driven requests.

Projects

Broker | *React, Node.js, Express.js, JavaScript, MarketStack API, OpenAI API, Postman*

GitHub

- Enabled stock performance analysis for **80+** users by developing a full-stack finance application analyzing market trends.
- Utilized real-time stock market data by integrating the MarketStack API to compute technical indicator.
- Generated AI-driven investment insights by integrating the OpenAI API to analyze calculated stock metrics.

AccountantQL | *Node.js, Express.js, Apollo Server, JavaScript, GraphQL, OpenAI API, Postman*

GitHub

- Streamlined personal finances by developing a GraphQL API to query accounts, budgets, bills, and financial goals.
- Generated AI-driven financial insights by integrating the OpenAI API to analyze financial data.
- Supported financial goal tracking by implementing GraphQL queries to monitor goal progress and budget tracking.

PollenMapz | *React, Vanta.js, Node.js, Express.js, JavaScript, Google Maps/Pollen API, MapboxGL*

GitHub

- Built a full-stack web application serving **40+** users to identify low-pollen parks using location-based pollen insights.
- Delivered real-time pollen severity insights by processing user location inputs for environmental tracking.
- Processed global pollen severity data for selected parks using the Google Pollen API to support real-time pollen tracking.

HabitAware – HunterHacks’25 Winner | *Python, MediaPipe, Streamlit, OpenCV, Git*

GitHub

- Collaborated with a team of three to build a computer vision tool that detects and tracks stress-related habits.
- Developed a backend timer system that tracks detected habit duration to generate behavior insights.
- Implemented real-time audio alerts for habit detection and presented the project to industry leaders.

Technical Skills

Languages: TypeScript, JavaScript, C++, Python, SQL, HTML, CSS

Frameworks & Libraries: Vanta.js, React.js, Node.js, Express.js, Jest, Playwright, Drupal CMS, Tailwind CSS

Developer Tools: Git, GitHub, Docker, NPM, Postman, HTTPie, Jira, Railway, Vercel

Backend & API Technologies: REST APIs, GraphQL, OpenAI API, Express Routing, JWT, CRUD Operations

Databases: MongoDB, MySQL
